TEST REPORT No. ESD 50157/01-01

Date: 16th November 2001 Page: 1 of 1

Your Ref: 16233

DATE RECEIVED: 16th November 2001

DESCRIPTION: Loading to failure of a non detachable bunk beds upper platform.

INTRODUCTION

The Product Testing Department of Scientific Group Services were asked to perform load testing on non detachable bunk bed upper platform. The method and results are as follows.

METHOD

The loads were applied using a dead weights starting from the centre outwards to evenly spread the load.

RESULTS

The upper platform withstood a total of 660kg before failure. For this reason no further load was added to the bed. Therefore it is our opinion that this bed is adequate for the purpose of which it was intended.

Tested by: L. Heathcock

Test Date: 16th November 2001
